Submission Issues

Manifested and selected non-manifested findings | SPX-A03-2026-1042 | Review date: October 28, 2026

Data note: *FedEx Corporation is used only as a real-world identity anchor. Submission premises, payroll, fleet, loss, rating and quote values are synthetic training data and are not claims about the real company.*

1. Manifested issues

P1 - Current driver roster and MVR review evidence missing

The submission checklist marks the current driver roster / MVR review as missing. The fleet schedule contains 312 active unit rows with assigned-driver IDs, but the ID fields state that no roster is attached; the draft quote also says there is no validated current driver-to-vehicle roster or current MVR review file. Treat this as an evidence gap, not a completed check.

Sources: A03_Submission_Checklist.xlsx, Submission Checklist row 13; A03_Fleet_Schedule.xlsx, Fleet Schedule rows 5-316; A03_Draft_Quote.pdf p. 1.

P3 - Declared fleet count differs from scheduled active units

ACORD 125 and the draft quote declare 290 power units, while the fleet schedule contains 312 active unit rows. The difference is 22 units, approximately 7.6% above the declared count. Reconcile the reporting date, eligibility and scope of the 22-unit difference before changing a rating input.

P6 - Workers compensation experience modifier mismatch

ACORD 130 shows an experience modification factor of 1.07, while the draft quote applies 0.94. The WC Rating Workbook records 0.94 as the prior-term factor effective November 1, 2025 and 1.07 as the current-term factor effective November 1, 2026. The proposed policy starts November 15, 2026; verify the current approved factor and update the quote through the carrier-approved rating process if required.

Sources: A03_ACORD130_Workers_Compensation.pdf p. 2; A03_WC_Rating_Workbook.xlsx, Experience Mod History rows 5-7 and Rating Inputs row 7; A03_Draft_Quote.pdf p. 1.

P7 - Declared operations and external public context require entity/scope matching

The application describes domestic parcel pickup, local delivery and regional ground routes and states that international freight forwarding and temperature-controlled cargo are not included. The broker narrative also describes regional freight transfer and some temperature-controlled / high-value cargo movements. The public-source workbook describes a group of operating companies and includes an OSHA record naming FedEx Ground Package System Inc. at 330 Resource Drive, Bloomington, California. These facts do not by themselves establish exposure at the parent company or at a synthetic scheduled premise; confirm the exact insured, operations and establishment match.

Sources: A03_ACORD_125_126_Combined.pdf, ACORD 125 p. 3; A03_Broker_Email.txt; A03_Operations_Public_Record_Supplement.txt; A03_External_Public_Research.xlsx, Corporate Context and OSHA Public Records.

P11 - Cargo exposure may exceed quoted limit and fall outside stated terms

The broker narrative gives a synthetic peak shipment value of $750,000 for high-value / temperature-controlled cargo. The draft quote provides a $100,000 cargo limit and excludes temperature-controlled goods. The stated peak value is 7.5 times the quoted limit, a nominal difference of $650,000. Refer the limit and exclusion to the cargo underwriter; do not treat the comparison alone as a final legal coverage determination.

2. Non-manifested issues

N3 - Workers compensation state allocation conflicts and ACORD 130 schedule is incomplete

The WC Rating Workbook has 25 class/location rows and assigns every row to TN, while the Property SOV places locations 02, 03 and 05 in AR, OK and TX respectively. ACORD 130 lists all five locations with Memphis, TN addresses, and its displayed class-payroll schedule is partial compared with the 25 workbook rows. Confirm actual work states and premises, then provide a complete state / class schedule before rating.

Sources: A03_ACORD130_Workers_Compensation.pdf pp. 1-2; A03_Property_SOV.xlsx, Statement of Values rows 5-9; A03_WC_Rating_Workbook.xlsx, Payroll by Class rows 5-29.

N4 - Workers compensation employee counts differ across form and workbook

For A03-LOC-01, the five ACORD 130 class rows total 156 full-time and 31 part-time employees (66+47+12+8+23 FT; 13+9+2+2+5 PT). The WC Rating Workbook totals 125 full-time and 15 part-time for the same location, with $4,420,000 payroll. ACORD 125 lists 125 full-time employees for location 01. The payroll total does not resolve the employee-allocation conflict; reconcile the counts and classification basis.

Sources: A03_ACORD130_Workers_Compensation.pdf p. 2; A03_ACORD_125_126_Combined.pdf, ACORD 125 p. 2; A03_WC_Rating_Workbook.xlsx, Payroll by Class rows 5-9.

N5 - Loss details do not reconcile to annual claim counts or WC history

The Loss Detail sheet contains 46 unique claim IDs and reported / calculated incurred totals of $6,926,927 with zero row-level incurred variances. Detail counts by year are 10, 9, 9, 9 and 9 for 2021-2025. ACORD 126 lists 5, 7, 8, 10 and 12 claims by year; ACORD 130 lists 9 WC claims in every year, while the detail has 9 WC claims in 2022 and none in the other years. The incurred total reconciles, but the annual and line-of-business claim counts do not.

Sources: A03_Loss_Runs.xlsx, Loss Detail rows 5-50 and Loss Summary rows 5-10; A03_ACORD_125_126_Combined.pdf, ACORD 126 p. 4; A03_ACORD130_Workers_Compensation.pdf p. 3.

N6 - General liability sales and area rating bases lack reconciliation

ACORD 125 and the draft quote use annual gross sales of $127,500,000. ACORD 126 lists sales-rated bases of $57,375,000 and $28,050,000, totaling $85,425,000 and leaving $42,075,000 without an allocation explanation. Its separate 450,000-sq-ft area-rated exposure does not reconcile to the 274,000 sq ft summed across ACORD 125 premises or the 625,000 sq ft in the Property SOV. The WC Rating Inputs sheet marks $57.375M aligned, although it matches only one GL sales row.

Sources: A03_ACORD_125_126_Combined.pdf, ACORD 125 p. 2 and ACORD 126 p. 3; A03_Draft_Quote.pdf p. 1; A03_Property_SOV.xlsx, Statement of Values rows 5-9; A03_WC_Rating_Workbook.xlsx, Rating Inputs row 10.

N7 - Fleet garaging-state codes conflict with addresses

The fleet schedule contains 312 active unit rows. Fifty-two units have Garaging State = OK, but their garaging address strings identify Memphis, Tennessee; the remaining 260 rows use TN. This is a state/address coding conflict that may affect territory and rating. Confirm actual garaging for the affected units rather than assuming either field is correct.

Sources: A03_Fleet_Schedule.xlsx, Fleet Schedule rows 5-316, columns I-J; Unit Count Reconciliation cells B5:D5.

N8 - Driver qualifications need review for heavy-vehicle assignments

The fleet schedule lists 62 tractor/trailer units with GVWR of 52,000 lb and assigned-driver ID placeholders. The IDs explicitly state that no driver roster is attached, and the packet contains no driver license class or CDL endorsement evidence. A03 does not establish a specific CDL-class mismatch, but qualification review cannot be completed until current driver and credential records are supplied; the roster/MVR evidence gap is also identified under P1.

Sources: A03_Fleet_Schedule.xlsx, Fleet Schedule rows 5-316, columns E-F and N; A03_Submission_Checklist.xlsx, Submission Checklist row 13; A03_Draft_Quote.pdf p. 1.

N15 - Workers compensation class rates differ across form and workbook

ACORD 130 lists rates per $100 payroll of 0.65 (7380), 0.73 (8292), 0.65 (8810), 0.73 (8742) and 0.93 (8017). The WC Rating Workbook lists 0.65, 0.82, 0.14, 0.33 and 0.71 respectively. Only class 7380 agrees; four of five rates differ. The workbook labels the rates synthetic and does not establish an authenticated filed / state-bureau rate source, so validate rather than assuming either table is authoritative.

Sources: A03_ACORD130_Workers_Compensation.pdf p. 2; A03_WC_Rating_Workbook.xlsx, Payroll by Class rows 5-29.

Selection note: *N14 is not repeated because public-record / entity matching is already covered by manifested P7. N8 flags a review need only; A03 lacks roster / CDL records to establish a mismatch. A03-only property / deductible findings are excluded from this A01-filtered list.*
